CED (Council of European Dentists)	92 - 97	2 Clarification of commonly used terms in this guidance document, subclause 'Health institution'	Paragraph starting with 'Examples of health institutions'	General	For further clarification, it would be useful for the users of this document, to make the list more concrete and exhaustive, therefore expanding further the examples of health institutions provided in order to include other entities that fit into the definition of health institution according to the MDR: namely 'an organisation the primary purpose of which is the care or treatment of patients or the promotion of public health' – e.g. healthcare practices (such as dental practices) also fit into that description.	'other healthcare practices, the primary purpose of which is the care or treatment of patients or the promotion of public health'
